

AerieHQ Shared Chromebook Classroom Procedure

AerieHQ school resource. Built for authorized school-managed instructional use.

Student routine

- Students take any available managed Chromebook.
- Students sign in using their school Google account.
- AerieHQ identifies the student by school email, not by physical laptop.
- Teacher imports the class roster and starts the room.
- Students match to the class roster and join or appear for teacher review.

Teacher routine

- Use the roster import before starting instruction.
- Verify missing/offline students immediately.
- Do not assign AerieHQ access by physical Chromebook unless your school requires a fixed lab workflow.
- At the end of class, require student sign-out so the next student starts cleanly.

Why this matters

- This workflow supports carts, labs, and shared-device environments where laptops rotate between students and classes throughout the day.

Note: Schools should review privacy, student notice, and data-processing documents with their internal leadership and legal counsel before broad deployment.
